**5.2 Miljöpolicy**

### Environmental policy.

Bharat Forge Kilsta AB manufactures forged and machined parts in steel.

Through openness and commitment to environmental issues, we shall create confidence in our business with customers, owners, employees, the public and the authorities. Environmental issues shall be incorporated into all aspects of our business

### Guidelines:

- With a holistic approach, continual improvement and measurable environmental goals we shall strive for minimal impact on the environment.
- Within the environmental area, we shall comply with applicable laws and regulations that affect us.
- We are committed to continuous improvements in environmental work and to minimize potential negative environmental impacts. This is done by constantly working to improve processes that are associated with identified environmental aspects.
- Where possible we recycle and separate waste, and we ensure that hazardous waste is handled safely.
- We use harmful substances as little as possible and choose environmentally friendly alternatives wherever possible.
- We shall put people's health and safety first.
- We shall analyze the environmental impact of new products and processes in advance.
- We shall educate, inform and encourage our personnel to engage, participate and take responsibility in environmental work.
- We shall set the same strict environmental requirements for suppliers, contractors and partners that we set for our own business.
- We shall openly disclose our environmental work and our environmental impact.

Niklas Blom

CEO, Bharat Forge Kilsta AB
